ARUN S.01

Design-minded developer building useful digital systems with a point of view.

01 PROFILE

I work across product strategy, interface design, and full-stack implementation. My best work makes complex systems feel obvious, durable, and worth returning to.

02 CAPABILITIES

Product thinking

Flows, systems, content, and interaction decisions.

Interface design

Editorial hierarchy, responsive layouts, motion, and accessibility.

Full-stack build

React interfaces, Node services, REST APIs, and data workflows.

03 TOOLKIT

- React / JavaScript
- Node.js / Express
- REST APIs
- MongoDB / MySQL
- HTML / CSS
- Git / modern tooling

04 SELECTED WORK

EXPENSE INTELLIGENCE

01 / Atlas Ledger

A calm financial workspace for tracking spending, categories, and monthly decisions.

LEARNING SYSTEMS

02 / Northstar LMS

A structured student management experience that makes progress and administration legible.

COMMERCE INTERFACE

03 / Registrar

A responsive e-commerce flow designed around discovery, confidence, and clear action.

05 WORKING STYLE

01 Frame

Find the real problem and name the system.

02 Shape

Give the experience a clear visual and verbal point of view.

03 Build

Ship the useful version, then refine what people touch.

06 / START A CONVERSATION

Available for thoughtful product work
